DETAILED ACTION

1 This action is responsive to the amendment filed on July 13, 2006.

2 The rejection of claims 1-46 under 35 U.S.C. 103(a) as being unpatentable over Cottard et al. (US 2001/0023515 A1) in view of Huglin et al. (WO 00/25730), is maintained for the reasons set forth in the previous office action mailed on April 10, 2006.

Response to Applicant's Arguments

3 Applicant's arguments filed 7/13/2006 have been fully considered but they are not persuasive.

With respect to the rejection of claims 1-46 under 35 U.S.C. 103(a) as being unpatentable over Cottard et al. (US 2001/0023515 A1) in view of Huglin et al. (WO 00/25730), Applicant argues that there is no suggestion or motivation to combine the references to arrive at the claimed invention.

The examiner respectfully disagrees with the above arguments because one cannot show nonobviousness by attacking references individually where the rejections are based on combinations of references. See *In re Keller*, 642 F.2d 413, 208 USPQ 871 (CCPA 1981); *In re Merck & Co.*, 800 F.2d 1091, 231 USPQ 375 (Fed. Cir. 1986). In this case, Cottard et al. (US' 515 A1) as a primary reference teaches that the composition may further comprises an effective quantity of other agents. For example agents that are already known for oxidation coloration (see page 17, paragraph, 0337). Huglin et al. (WO' 730) as a secondary reference clearly teaches a cosmetic composition comprising a light stabilizer compounds such as methylglycinediacetic acid of a formula similar to the claimed formula (I) (see page 14, formula 72). It further taught by Huglin et al. that the light stabilizers are used for protecting hair-care product against

Art Unit: 1751

photolytic degradation (see page 23, lines 1-6 under the table) and wherein the hair-care products include hair dyeing (see page 24, line 8). Therefore, there is a clear suggestion and sufficient motivation to one having ordinary skill in the art to be motivated to incorporate the claimed species of methylglycinediacetic acid as taught by Huglin et al. (WO' 730) in the dyeing composition of Cottard et al. (US' 515 A1) to arrive at the claimed invention with the reasonable expectation of success for stabilizing the dyeing composition against photolytic degradation. Therefore, the prima facie case of obviousness has been established.

With respect to the applicant's argument that Huglin et al. actually teaches away from the use of the light stabilizer compounds such as methylglycinediacetic acid in the hair dye compositions, the examiner would like to point out that the light stabilizer compounds as taught by Huglin et al. are used in hair care products such as hair dyeing (see page 24, line 8). Therefore, the references are belonging to the same analogous art of hair treating formulations in particular dyeing formulations.

4 **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Art Unit: 1751

however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
